

# Classic Yo Information

## Features

The Popular Starter Yo-Yo

## Common Questions

For related videos and downloads visit [www.NEDkids.com](http://www.NEDkids.com)

### Which Yos glow in the dark?

The NED Yo glows on both sides.

### Can the Classic Yos sleep?

Yes! By removing two of the three wraps around the axle, the Classic Yos can “sleep” (spin continuously). But, keep in mind that the Classic Yo is a perfect starter yo-yo, and is not designed for long sleeping tricks. See the “How to remove the hitch (for advanced tricks)” instructions in the section below.

### Why would the yo-yo need to come apart?

The only time a yo-yo needs to come apart is for knot removal. If the string becomes all bunched up, just twist the yo-yo open, untangle the knot, slide the spool back over the axle and carefully close the yo-yo back up – being sure to not let the string pinch anywhere.

## How to remove the hitch (for advanced tricks)

The Classic Yos comes hitched
